

Disinfection barrier - on floor

The solution to prevent the spread of diseases and viruses in livestock.

Pump

Control box

Dosing pump

Sensor

Pair of risers - 1,20 m

Screened polyethylene tank

Wheel arch - 1,50 m

Extension - 1,20 m

Specifications

- 12 spray nozzles
- Hot-dip galvanised metal structure made up of 1.20m elements to be assembled
- Solution distribution in stainless steel tube
- Dosing pump
- Dimensions : L: 4.80m h: 1.20m to 4.80m

Pump / motor

- One-piece centrifugal pump with direct motor/pump coupling
- Single-phase motor 230 volts - 2 900 rpm - 0.75kW
- Thermal protection and capacitor
- Cast iron pump body and lantern
- Brass impeller - stainless steel shaft

Control box

- 220 volts
- Start and stop of the unit by vehicle detection
- Photocell sensor

Options

- Polyethylene tank, 100L
- Wheel arch, 1,50 m

HYDROCLEAN

Haute pression et brumisation

Disinfection barrier - Gutter

The solution to prevent the spread of diseases and viruses in livestock

Pump

Control box

Dosing pump

Sensor

Pair of risers - 1,20 m

Screened polyethylene tank

Specifications

- 12 spray nozzles
- Hot-dip galvanised metal structure consisting of 1.20m elements to be assembled
- Solution distribution in stainless steel tube
- Dosing pump
- Dimensions : L: 4.80m h: 1.20m à 4.80m

Pump / motor

- One-piece centrifugal pump with direct motor/pump coupling
- Moteur monophasé 230 volts - 2 900 tr/min - 0.75kW
- Protection thermique et condensateur
- Corps de pompe et lanterne en fonte
- Turbine en laiton - arbre en inox

Control box

- 220 volts
- Start and stop of the unit by vehicle detection
- Photocell sensor

Options

- Polyethylene tank, 100L

Extension - 1,20 m
